NEW! CONTENT MARKETING

Content Marketing is an ad product where you as an advertiser get the opportunity to publish editorial material both in print and digitally. The article must be delivered "finished" or we can help you get in touch with people who can make the articles. We then customize this so that it can be published in one of our magazines

and on tungt.no. An article of this type will be highlighted with «Advertisement» according to editorial responsibility and Norwegian Press Association's Ethical Code of Practice for the Press.
